INDEX TO VOLUME 55

AUTHOR INDEX*†

A

AJELLO, LIBERO. (*See* McDONOUGH, AJELLO, GEORG, AND BRINKMAN), 116

ALEXANDER, ROBERT W. (*See* BALDWIN, ALEXANDER, AND WARNER), 362

ALLARD, J. RICHARD, WARE, WILLIAM H., AND BENNETT, LESLIE L. Negative chronotropism and inotropism of procaine amide in the heart, 129

ALLBRITTEN, FRANK F., JR. (*See* DRESSLER, MASTIO, AND ALLBRITTEN), 144

ATIK, M. (*See* COHN, ATIK, HARTWIG, COTLAR, MORELAND, AND WERNER), 917

B

BACCHUS, HABEEB. Serum seromucoid and acid mucopolysaccharide in the Marfan syndrome, 221

BAJEC, DUSAN F. (*See* CARTER, BAJEC, YANNICELLI, AND WOOD), 77

BALDWIN, DAVID, ALEXANDER, ROBERT W., AND WARNER, ERNEST G., JR. Chronic sodium chloride challenge studies in man, 362

BARKER, HAROLD G. (*See* MERCHANT, GOLDBERGER, AND BARKER), 790

BARRETT, BEACH, WOOD, PATRICIA ANN, AND VOLWILER, WADE. Quantitation of gamma globulins in human serum by immunoprecipitation, 605

BARROW, EMILY M., BULLOCK, WILLIAM R., AND GRAHAM, JOHN B. A study of the carrier state for plasma thromboplastin component (PTC, Christmas factor) deficiency, utilizing a new assay procedure, 936

BARRY, KEVIN G., McLAURIN, ANGUS W., AND PARNELL, BENJAMIN L. A practical temperature-compensated hand refractometer (the TS meter): its clinical use and application in estimation of total serum proteins, 803

BEIERWALTES, WILLIAM H. (*See* ROBINSON AND BEIERWALTES), 1

BELLET, SAMUEL. (*See* SOSA-FANTAUZZI, DREIFUS, AND BELLET), 897

BENNETT, LESLIE L. (*See* ALLARD, WARE, AND BENNETT), 129

BERMAN, H. (*See* KEITEL, GAUTIER, JONES, BERMAN, AND MacLACHLAN), 449

BERRY, HELEN K., AND SPINANGER, JOAN. A paper spot test useful in study of Hurler's syndrome, 136

BERRY, J. NORMAN, OWEN, EDWARD E., FLANAGAN, JOHN F., AND TYOR, MALCOLM P. The effect of acute hyperventilation on the blood ammonia concentration of patients with liver disease, 849

BEUTLER, ERNEST, AND BUTTENWIESER, ELLEN. The regulation of iron absorption. I. A search for humoral factors, 274

BEZMAN, ALYCE L. (*See* BROITMAN, KINNEAR, GOTTLIEB, BEZMAN, VITALE, AND ZAMCHECK), 55

BHATTACHARJEE, S. B. (*See* LALA, BHATTACHARJEE, AND DAS GUPTA), 548

BIGGS, ALFRED D., JR. (*See* WALDSTEIN, GREENBURG, BIGGS, AND CORN), 462

BLAIR, ALBERTA, AND SEGAL, STANTON. The isolation of blood glucose as potassium gluconate, 959

BLAIR, CALVIN. (*See* SHAPIRO), 715

BLAIR, JOHN E., AND CARR, MIRIAM. The techniques and interpretation of phage typing of staphylococci, 650

BLOOM, BEN. The hazard of orally pipetting tritium oxide, 164

BLOOMFIELD, NORMAN. Reactions in the latex-fixation test for rheumatoid arthritis with serum of syphilitic individuals, 73

BOLLET, ALFRED JAY. (*See* GOODWIN AND BOLLET), 965

BONGIOVANNI, ALFRED M. Hydrolysis of certain pure steroidal conjugates in aqueous solution, 812

BORCHGREVINK, C. F., POOL, JUDITH G., AND STORMORKEN, HELGE. A new assay for factor V (proaccelerin-accelerin) using Russell's viper venom, 625

BOWSER, EVERETT. (*See* HELLER, HENDERSON, BOWSER, LEVITSKY, AND ZIMMERMAN), 29

*In the index, following the author's name, the title of the subject is given as it appeared in the JOURNAL.

†January, pp. 1-164; February, pp. 165-330; March, pp. 331-496; April, pp. 497-662; May, pp. 663-828; June, pp. 829-992.

BRACKETT, N. C., JR., AND SMYTHE, CHEVES McC. The influence of hypertension on susceptibility of the rat kidney to infection, 530
BRADLEY, G. MARY (*See* SPINK AND BRADLEY), 535
BRINKMAN, SHERRY. (*See* McDONOUGH, AJELLO, GEORG, AND BRINKMAN), 116
BROITMAN, SELWYN A., KINNEAR, DOUGLAS G., GOTTLIEB, LEONARD S., BEZMAN, ALYCE L., VITALE, JOSEPH J., AND ZAMCHECK, NORMAN. Effect of neomycin alteration of the rat intestinal flora on serum cholesterol and valvular sudanophilia, 55
BROWN, E. B. JR. Plasma electrolyte composition in dogs breathing high CO_2 mixtures: source of bicarbonate deficit in severe respiratory acidosis, 767
BROWN, FRANK. (*See* SHIRES, WILLIAMS, AND BROWN), 776

SUBJECT INDEX*

A

Acid mucopolysaccharide, serum seromucoid and, in Marfan syndrome, 221
uric, removal of, by artificial kidney in patients with acute renal failure, 268
Acid-base metabolism, electrolyte, and acute effects of chlorothiazide on, 191
Acidity, gastric, blood serum azure A level in determination, by tubeless gastric analysis, 815
Acidosis, diabetic, mineral and water content of erythrocytes in, and during recovery; changes in potassium content, 449
severe respiratory, source of bicarbonate deficit in: plasma electrolyte composition in dogs breathing high CO_2 mixtures, 767
Adenovirus, Asian strain influenza, and unknown cause, comparison of clinical manifestations of respiratory illnesses due to, 497
Adrenal cortical α-ketolic steroids, determination, by quantitative paper chromatography, 796
Agar diffusion precipitin test, micro, modifications, 593
Agglutination and sequestration of immature red cells, 663
Agglutinins, Salmonella pullorum, diphtheria antitoxin and, in bovine milk and blood after immunization by udder infusion, 229
Agglutinogen contents, fucose and, in saliva in subjects with duodenal ulcers, 386
Albumin synthesis, daily, difference, between normal men and women measured by I^{131}-labeled albumin, 904
Alcoholism, chronic, magnesium balance studies in, 98
Alkaline-incinerator method of serum protein-bound iodine measurement, reliability, 643
Alpha ketolic steroids, adrenal cortical, determination, by quantitative paper chromatography, 796
Ammonia analysis, preservation of blood for, 790
concentration, blood, in liver disease, effect of acute hyperventilation: role of kidney, liver, and extremity, 849
tolerance in liver disease, 855
Anemia, megaloblastic, glycolytic, citric acid cycle, and hexosemonophosphate shunt enzymes of plasma and erythrocytes, 425
sickle cell renal concentrating ability in children with, and in normal children, comparative study, 400
Antibiotics, in vitro effects on yeast phase of Blastomyces dermatitidis and other fungi, 116
Antibody against Ehrlich mouse ascites carcinoma, labeling, with tritium (H^3), 46
in milk and role in passive immunization: absorption of diphtheria antitoxin in milk from human gastrointestinal tract, 239
diphtheria antitoxin and Salmonella pullorum agglutinins in bovine milk and blood after immunization by udder infusion, 229
molecule in chronic nonspecific thyroiditis: electrophoretic patterns of serum, 733
Antigens of normal leukocytes, study, 110
Antiglobulin consumption test and investigations of autoantibody eluates in immunohematology, 9
Antitoxin, diphtheria, absorption of, in milk from human gastrointestinal tract, 239
and Salmonella pullorum agglutinins in bovine milk and blood after immunization by udder infusion, 229
Aorta, rabbit, bioassay for urinary catechol amines with strips of, 748
Aqueous solution, hydrolysis of pure steroidal conjugates in, 812
Arginase activity, serum in hepatocellular damage, 522
Arginine ester hydrolysis by sera, colorimetric determination, 616
Arterial dilution curves, estimation of left-to-right shunt from, 77
pressures, normal pulmonary, ventricular septal defects and, effect of exercise on pulmonary blood flow and left-to-right shunt in patients with, 689
Arthritis, rheumatoid, reactions in latex-fixation test for, with serum of syphilitic individuals, 73
Ascites carcinoma, Ehrlich mouse, labeling of antibody against, with tritium (H^3), 46

*January, pp. 1-164; February, pp. 165-330; March, pp. 331-496; April, pp. 497-662; May, pp. 663-828; June, pp. 829-992.

Asian strain influenza, adenovirus, and unknown cause, comparison of clinical manifestations of respiratory illnesses due to, 497
Autoantibody eluates, antiglobulin consumption test and, in immunohematology, 9
Autoclavable plastic, use of, for do-it-yourself solutions to laboratory problems of safety, 319
Azure A level, blood serum, in determination of gastric acidity by tubeless gastric analysis, 815

B

Bacterial invasion of blood after oral surgical procedure, 376
  populations, mixed, selective method for isolation of Listeria monocytogenes from, 153
  pyrogens, metabolic effects, on leukocytes, 584
Bacteriophage suspensions for staphylococcal typing, rapid method for preparation, 809
Bat, rabid, fatal human case of rabies following bite of, 89
Benzidine oxidase, serum, 260
Bicarbonate deficit, source, in severe respiratory acidosis: plasma electrolyte composition in dogs breathing high CO_2 mixtures, 767
Bile, gall bladder, human, study of carbohydrates in, 38
Bioassay of erythropoietin in human plasma, comparison of methods, 67
  for urinary catechol amines with strips of rabbit aorta, 748
Biologic fluids, microdetermination of gold in, employing chloric acid and orthotolidine, 965
  properties of human leukemic and tumoral RNA: effect of different media on cytopathogenicity in tissue culture, 694
    leukemia and neoplasms induced in mice with human leukemic RNA carried in tissue culture, 706
Blastomyces dermatitidis and other fungi, in vitro effects of antibiotics on yeast phase of, 116
Blood ammonia concentration in liver disease, effect of acute hyperventilation: role of kidney, liver, and extremity, 849
  bacterial invasion after oral surgical procedures, 376
  bovine milk and, diphtheria antitoxin and Salmonella pullorum agglutinins in, after immunization by udder infusion, 229
  determination of phenylalanine in, enzymatic spectrophotometric method, 491
Blood—Cont'd
  flow, pulmonary, and left-to-right shunt, effect of exercise on, in patients with ventricular septal defects and normal pulmonary arterial pressures, 689
  glucose, isolation as potassium-gluconate, 959
  obtained from donors with sickle cell trait, influence of storage on erythrocyte survival in, 94
  oxygen content, spectrophotometric determination, 784
  and plasma, effect of Duolite treatment on growth promoting properties of, 633
  preservation, for ammonia analysis, 790
  serum azure A level in determination of gastric acidity by tubeless gastric analysis, 815
  volume measurement, abbreviated method for employing radiochromium, 149
Bone marrow transplant in acquired hypogammaglobulinemia, 105
Brucellosis, persistent parasitism in: long-term tetracycline therapy, 535

C

Candidiasis, vulvovaginal, Taschdjian's medium in diagnosis, 820
Carbohydrates in human gall bladder bile, study, 38
  protein-bound, in paper electrophoresis, elimination of background staining in periodic acid–Schiff method, 158
Carcinoma, Ehrlich mouse ascites, labeling of antibody against, with tritium (H^3), 46
Cardiac and renal diseases, mechanism of action of chlorothiazide in; acute effects on renal and systemic hemodynamics and metabolism, 182
Catechol amines, urinary, bioassay for, with strips of rabbit aorta, 748
Cells, nonhemopoietic, detection, in circulation on collodion films, 322
Chloric acid and orthotolidine, used in microdetermination of gold in biologic fluids, 965
Chlorothiazide, acute effects on electrolyte and acid-base metabolism, 191
  mechanisms of action, in cardiac and renal diseases; acute effects on renal and systemic hemodynamics and metabolism, 182
Cholesterol, serum, and valvular sudanophilia, effect of neomycin alteration of rat intestinal flora on, 55
Christmas factor deficiency, study of carrier state for new assay, 936
Chromatography, gas, clinical application, to analysis of respiratory gases, 144
  quantitative paper, determination of adrenal cortical α-ketolic steroids by, 796

Chronotropism and inotropism, negative, of procaine amide in heart, 129
Circulation, detection of nonhemopoietic cells in, on collodion films, 322
Cirrhosis, fatty metamorphosis and, of liver, distribution of Co^{58}-labeled vitamin B_{12} in rat with, 29
hepatic, sodium excretion defect, use of steroidal lactone, 872
patients with, and subjects without liver disease, effect of intravenous glucose on splanchnic and peripheral metabolism of pyruvate and citrate in, 841
splanchnic uptake of glucose, inorganic phosphorus, and potassium after intravenous glucose load in, 829
Citric acid cycle, glycolytic, and hexosemonophosphate shunt enzymes of plasma and erythrocytes in megaloblastic anemia, 425
Clinical practice, evaluation of media for early detection of Pseudomonas aeruginosa encountered in, 139
CO_2 mixtures, high, plasma electrolyte composition in dogs breathing: source of bicarbonate deficit in severe respiratory acidosis, 767
Co^{58}-labeled vitamin B_{12}, distribution, in rat with fatty metamorphosis and cirrhosis of liver, 29
Coagulation, effects of high fat meal on, in hemophilia, 245
Collodion films, detection of nonhemopoietic cells in circulation on, 322
Colorimetric determination of arginine ester hydrolysis by human sera, 616
Conversion ratio, radioiodine, modified resin method for determination of, 132
Copper, serum, spectrophotometric determination with oxalyldihydrazide, 325
Cortical, adrenal, α-ketolic steroids, determination, by quantitative paper chromatography, 796
Cortisone, penicillin and, effects on experimental staphylococcal infection in mice, 199
Cr^{51}, I^{131}, $S^{35}O_4$ and, use in simultaneous measurement of plasma volume, extracellular fluid volume, and red blood cell mass, 776
Culture, tissue, cytopathogenicity in, effect, of different media, biologic properties of human leukemic and tumoral RNA, 694
human leukemic RNA carried in, leukemia and neoplasms induced in mice with, 706
Cultures, bacterial, control of pH in, 639

D

DCA hypertension, susceptibility of rats with, to experimental pyelonephritis and aggravation of, by renal infection, 715
Defect, sodium excretion, in hepatic cirrhosis, use of steroidal lactone, 872
Dehydrogenase, glucose-6-phosphate, inhibition, by hemolysis inducing drugs, 757
Detection, early, of Pseudomonas aeruginosa in clinical practice, evaluation of media for, 139
Dextran, use, in paroxysmal nocturnal hemoglobinuria, 946
Diabetic acidosis, mineral and water composition of erythrocytes in, and during recovery; changes in potassium content, 449
Diagnostic tool, hemagglutination reaction as, in infectious hepatitis, 726
Digital venous tone and venous activity, rheoplethysmographic studies, 342
Diisopropylfluorophosphate, radioactive (DFP^{32}), labeling of red blood cells: evidence for initial release of label, 416
Dilution curves, arterial, estimation of left-to-right shunt from, 77
Diphtheria antitoxin, absorption of, in milk from human gastrointestinal tract, 239
and Salmonella pullorum agglutinins in bovine milk and blood after immunization by udder infusion, 229
Disease, liver, ammonia tolerance in, 855
effect of acute hyperventilation on blood ammonia concentration in patients with, 849
subjects without, patients with cirrhosis and, effect of intravenous glucose on splanchnic and peripheral metabolism of pyruvate and citrate in, 841
splanchnic uptake of glucose, inorganic phosphorus, and potassium after intravenous glucose load, 829
Distillation apparatus, continuous glass, inexpensive, 329
DNA synthesis by marrow in vitro, effect of heparin and EDTA on, 435
Drugs, hemolysis inducing, inhibition of glucose-6-phosphate by, 757
Duodenal ulcers, fucose and agglutinogen contents of saliva in subjects with, 386
Duclite treatment, effect on growth promoting properties of blood and plasma, 633
Dye, local spread of, injected intradermally to visualize lymphatics in edematous and nonedematous extremities of man, 250
Dysproteinemia as a cause of proteinuria in experimental nephrosis, invalidation of hypothesis, 510

E

Editors, letter from, 1
EDTA, heparin and, effect on DNA synthesis by marrow in vitro, 435

Electrolyte and acid-base metabolism, acute effects of chlorothiazide on, 191
plasma, composition in dogs breathing high CO_2 mixtures: source of bicarbonate deficit in severe respiratory acidosis, 767
Electrophoresis, paper, elimination of background staining in periodic acid–Schiff method for protein-bound carbohydrates, 158
in evaluating effect of long-term estrogen therapy on serum lipoproteins in man, 682
Electrophoretic patterns of serum in thyroiditis, 733
Eluates, autoantibody, antiglobulin consumption test and, in immunohematology, 9
Enzymatic spectrophotometric method for determination of phenylalanine in blood, 491
Enzymes, glycolytic, citric acid cycle, and hexosemonophosphate shunt, of plasma and erythrocytes in megaloblastic anemia, 425
Erythrocyte mass, plasma volume, extracellular fluid volume and, in man, simultaneous measurement, utilizing I^{131}, $S^{35}O_4$, and Cr^{51}, 776
metabolism; equilibration of glucose-C^{14} between serum and erythrocytes, 281
glucose metabolism and pathways, 286
survival in blood from donors with sickle cell trait, influence of storage on, 94
Erythrocytes, estimation of hemoglobin content, with Romanowsky stains, 486
immature, agglutination and sequestration, 663
mineral and water composition, in diabetic acidosis and during recovery; changes in potassium content, 449
plasma and, glycolytic, citric acid cycle, and hexosemonophosphate shunt enzymes, in megaloblastic anemia, 425
Erythropoiesis, studies on; comparison of methods of bioassay of erythropoietin in human plasma, 67
Erythropoietin, attempts to develop in vitro system for, 311
Estrogen therapy, long-term, effect, on serum lipoproteins in man, paper electrophoresis in evaluating, 682
Exercise, effect, on pulmonary blood flow and on left-to-right shunt in patients with ventricular septal defects and normal pulmonary arterial pressures, 689
Extracellular fluid volume, plasma volume, and red blood cell mass in man, simultaneous measurement, utilizing I^{131}, $S^{35}O_4$, and Cr^{51}, 776
Extremities, edematous and nonedematous, in man, local spread of dye injected intradermally to visualize lymphatics in, 250
Extremity, role in increase of blood ammonia during acute hyperventilation, in patients with liver disease, 849

F

Factor V, new assay, for using Russell's viper venom, 625
Family with hemoglobin G, 60
Fat emulsions, intravenous, prolonged administration, 917
ingestion, effects on coagulation in hemophilia, 245
phagocytosis by leukocytes in vivo and in vitro, 564
Fatty metamorphosis and cirrhosis of liver, distribution of Co^{58}-labeled vitamin B_{12} in rat with, 29
Fluid, extracellular, volume, plasma volume, and red blood cell mass in man, simultaneous measurement, utilizing I^{131}, $S^{35}O_4$, and Cr^{51}, 776
Fucose and agglutinogen contents of saliva in subjects with duodenal ulcers, 386
in saliva, estimation, 381
Funds, research, "socialization" of, 3
Fungi, other, and Blastomyces dermatitidis, in vitro effects of antibiotics on yeast phase of, 116

G

Galactose, hepatic maximum removal capacity for, in humans, 462
Gall bladder bile, human, study of carbohydrates in, 38
Gamma globulin, bovine, effect of prior sensitization on renal lesions produced by, in hypersensitive rabbits, 439
globulins, quantitation in human serum by immunoprecipitation, 605
separation of 6.6S and 18S, with isohemagglutinin activity, 912
ray counter for clinical tracer studies, 476
Gases, respiratory, clinical application of gas chromatography to analysis of, 144
Gastric acidity, blood serum azure A level in determination, by tubeless gastric analysis, 815
Gastrointestinal tract, human, absorption of diphtheria antitoxin in milk from, 239
Glass, continuous, distillation apparatus, inexpensive, 329
Gluconate, potassium, isolation of blood glucose as, 959
Glucose, inorganic phosphorous, and potassium, splanchnic uptake, after intravenous glucose load in patients with cirrhosis and in subjects without liver disease, 829
intravenous, effect, on splanchnic and peripheral metabolism of endogenous pyruvate and citrate in patients with cirrhosis and in subjects without liver disease, 841
metabolism and pathways, 286

Glucose-C^{14}, equilibration of, between serum and erythrocytes, 281
Glucose-6-phosphate dehydrogenase, inhibition, by hemolysis inducing drugs, 757
Glycolysis, respiration, and nucleic acid synthesis, leukocyte, 584
Glycolytic, citric acid cycle, and hexosemonophosphate shunt enzymes of plasma and erythrocytes in megaloblastic anemia, 425
Gold, microdetermination, in biologic fluids employing chloric acid and orthotolidine, 965

H

Heart, negative chronotropism and inotropism of procaine amide in, 129
Hemagglutination reaction, as diagnostic tool in infectious hepatitis, 726
test for viral hepatitis; nonspecific reactions, 519
Hemodynamics and metabolism, renal and systemic, acute effects of chlorothiazide on, 182
Hemoglobin content of red cells, estimation with Romanowsky stains, 486
Hemoglobin G, family with, 60
Hemoglobinuria, paroxysmal nocturnal, use of clinical dextran in, 946
Hemolysis inducing drugs, inhibition of glucose-6-phosphate by, 757
Hemophilia, effects of high fat meal on coagulation and, 245
Heparin and EDTA on DNA synthesis by marrow in vitro, effect, 435
Hepatic cirrhosis, sodium excretion defect, use of steroidal lactone, 872
maximum removal capacity for galactose in humans, 462
Hepatitis, infectious, hemagglutination reaction as diagnostic tool in, 726
viral, hemagglutination test for; nonspecific reactions, 519
Hepatocellular damage serum arginase activity in, 522
Hexosemonophosphate shunt, glycolytic, citric acid cycle and, enzymes of plasma and erythrocytes in megaloblastic anemia, 425
Humoral factors, search for; regulation of iron absorption, 274
Hurler's syndrome, paper spot test useful in study of, 136
Hydrolysis, arginine ester, by sera, colorimetric determination, 616
of pure steroidal conjugates in aqueous solution, 812
test, urine, for primitive white blood cell differentiation, evaluation, 883
Hypersensitivity in rabbit: effect of prior sensitization on renal lesions produced by bovine gamma globulin, 439
Hypertension, DCA, susceptibility of rats with, to experimental pyelonephritis and aggravation by renal infection, 715
and susceptibility of rat kidney to infection, 530
Hyperventilation, acute, effect, on blood ammonia concentration in liver disease: role of kidney, liver, and extremity, 849
Hypogammaglobulinemia, acquired, bone marrow transplants in, 105

I

I^{131}, $S^{35}O_4$, and Cr^{51}, use in simultaneous measurement of plasma volume, and red blood cell mass, 776
I^{131}-labeled albumin, difference in daily albumin synthesis between normal men and women as measured with, 904
Immunization, passive antibody in milk and role in, 229
by udder infusion, diphtheria antitoxin and Salmonella pullorum agglutinins in bovine milk and blood after, 229
Immunohematology, antiglobulin consumption test and autoantibody eluates in, 9
Immunoprecipitation, quantitation of gamma globulins in human serum by, 605
Infection, experimental, produced by penicillin-resistant staphylococci, effects of penicillin on, 165
staphylococcal, in mice: effects of inoculum size, strain variation, penicillin, and cortisone, 199
hypertension and susceptibility of rat kidney to, 530
renal, aggravation of DCA hypertension by, susceptibility of rats with DCA hypertension to experimental pyelonephritis and, 715
urinary tract, clean-voided urine culture in population studies, 557
Infectious hepatitis, hemagglutination reaction as diagnostic tool in, 726
Infectivity and interrelationships of 2060 and JH viruses in volunteers, 331
Influenza, Asian strain, adenovirus, and unknown cause, comparison of clinical manifestations of respiratory illnesses due to, 497
Inotropism, negative chronotropism and, of procaine amide in heart, 129
Intestinal flora, rat, effect, of neomycin alteration, on serum cholesterol and valvular sudanophilia, 55
Iodine, protein-bound, reliability of alkaline-incinerator method of measurement, 643
Iron absorption: influence of iron stores on, in normal subject, 216
determination in rats by measurement of total body radioactivity, 929
regulation of: search for humoral factors, 274
stores, influence, on iron absorption in normal subject, 216

Isohemagglutinin activity, separation of 6.6S and 18S gamma globulins with, 912
Isolation of Listeria monocytogenes from mixed bacterial populations, selective method for, 153
Isotopes, simultaneous measurement of plasma volume, extracellular fluid volume, and red blood cell mass in man utilizing, 776

K

Kidney, artificial, removal of uric acid by, in patients with acute renal failure, 268
  role in, increase in blood ammonia during acute hyperventilation, in patients with liver disease, 849
  susceptibility to infection, hypertension and, 530

L

Label, evidence for initial release of, after labeling of red blood cells with diisopropylfluorophosphate (DFP^{32}), 416
Labeling of antibody against Ehrlich mouse ascites carcinoma with tritium (H_3), 46
Laboratory problems of safety, use of autoclavable plastic for do-it-yourself solutions, 319
Latex-fixation test for rheumatoid arthritis, reactions in, with serum of syphilitic individuals, 73
Left-to-right shunt, estimation, from arterial dilution curves, 77
    pulmonary blood flow and, effect of exercise on, in patients with ventricular septal defects and normal pulmonary arterial pressures, 689
Letter from editors, 1
Leukemia and neoplasms induced in mice with human leukemic RNA carried in tissue culture, 706
Leukemic patients, survival time of leukocytes in, 548
  RNA, human, carried in tissue culture, leukemia and neoplasms induced in mice with, 706
  and tumoral RNA, human, biologic properties of: effect of different media on cytopathogenicity in tissue culture, 694
Leukocyte alkaline phosphatase: role of zinc and magnesium, 303
  respiration, glycolysis, and nucleic acid synthesis, 584
Leukocytes, lipophagocytosis by, in vitro and in vivo, 564
  normal study of antigens of, 110
  primitive, differentiation, urine hydrolysis test, 883
  survival time of, in leukemic patients, 548
Lipophagocytosis by human white blood cells in vitro and in vivo, 564
Lipoproteins, serum, in man, paper electrophoresis in evaluating effect of long-term therapy on, 682
Listeria monocytogenes, selective method for isolation of, from mixed bacterial populations, 153
Liver, cirrhosis of, sodium excretion defect in, use of steroidal lactone, 872
  disease, ammonia tolerance in, 855
    effect of acute hyperventilation on blood ammonia concentration in patients with: role of kidney, liver, and extremity, 849
    subjects without, patients with cirrhosis and, effect of intravenous glucose on splanchnic and peripheral metabolism of pyruvate and citrate in, 841
      splanchnic uptake of glucose, inorganic phosphorus, and potassium after intravenous glucose load in, 829
  fatty metamorphosis and cirrhosis, distribution of Co^{58}-labeled vitamin B_{12} in rat with, 29
Lymphatics in edematous and nonedematous extremities of man, local spread of dye injected intradermally to visualize, 250

M

Magnesium balance studies in chronic alcoholism, 98
  role of zinc and, in leukocyte alkaline phosphatase, 303
Marfan syndrome, serum seromucoid and acid mucopolysaccharide in, 221
Marrow, bone, transplant in acquired hypogammaglobulinemia, 105
  DNA synthesis by, in vitro, effect of heparin and EDTA, 435
Media, effect of different, on cytopathogenicity in tissue culture, produced by human leukemic and tumoral RNA, 694
  evaluation, for early detection of Pseudomonas aeruginosa in clinical practice, 139
Megaloblastic anemia, glycolytic, citric acid cycle, and hexosemonophosphate shunt enzymes in plasma and erythrocytes, 425
Metabolic effects of bacterial pyrogens upon human leukocytes, 584
Metabolism, electrolyte and acid-base, acute effects of chlorothiazide on, 191
  equilibration of glucose-C^{14} between serum and erythrocytes, 281
  erythrocyte; glucose metabolism and pathways, 286
  glucose, phosphorus, and potassium, 829
  renal and systemic hemodynamics and, acute effects of chlorothiazide on, 182
  sodium, measurement of body radioactivity for studies, 476

Metabolism—Cont'd
splanchnic and peripheral, of endogenous pyruvate and citrate in patients with cirrhosis and in subjects without liver disease, effect of intravenous glucose on, 841
Metamorphosis, fatty, and cirrhosis of liver, distribution of Co^{58}-labeled vitamin B_{12} in rat with, 29
Method, abbreviated, for blood volume measurement employing radiochromium, 149
alkaline-incinerator, of serum protein-bound iodine measurement, reliability, 643
enzymatic spectrophotometric, for determination of phenylalanine in blood, 491
modified resin, for determination of radioiodine conversion ratio, 132
periodic acid–Schiff, for protein-bound carbohydrates in paper electrophoresis, elimination of background staining, 158
selective, for isolation of Listeria monocytogenes from mixed bacterial populations, 153
Methods of bioassay of erythropoietin in human plasma, comparison, 67
Micro agar diffusion precipitin test, modifications, 593
Microdetermination of gold in biologic fluids employing chloric acid and orthotolidine, 965
Milk, absorption of diphtheria antitoxin in, from human gastrointestinal tract, 239
and blood, bovine, diphtheria antitoxin and Salmonella pullorum agglutinins in, after immunization by udder infusion, 229
Mineral and water composition of human red blood cells in diabetic acidosis and during recovery; changes in potassium content, 449
Molecule, antibody, in chronic nonspecific thyroiditis: electrophoretic patterns of serum, 733
Molar sodium lactate and equimolar sodium chloride, effect, on renal excretion of sodium and water, 897
Mucopolysaccharide, acid, serum seromucoid and, in Marfan syndrome, 221

N

Neomycin alteration of rat intestinal flora, effect, on serum cholesterol and valvular sudanophilia, 55
Neoplasms, leukemia and, induced in mice with human leukemic RNA carried in tissue culture, 706
Nephrosis, experimental, invalidation of hypothesis of dysproteinemia as cause of proteinuria in, 510
Nonhemopoietic cells, detection, in circulation on collodion films, 322
Nucleic acid synthesis respiration, glycolysis and, leukocyte, 584

O

Oral surgical procedures, bacterial invasion of blood after, 376
Orally pipetting tritium oxide, hazard, 164
Orthotolidine, chloric acid and, used in microdetermination of gold in biologic fluids, 965
Oxalyldihydrazide, spectrophotometric determination of serum copper with, 325
Oxygen content, blood, spectrophotometric determination, 784

P

Paper chromatography, quantitative, determination of adrenal cortical α-ketolic steroids by, 796
electrophoresis, elimination of background staining in periodic acid–Schiff method for protein-bound carbohydrates in, 158
in evaluating effect of long-term estrogen therapy on serum lipoproteins in man, 682
spot test useful in study of Hurler's syndrome, 136
Parasitism, persistent, in brucellosis: long-term tetracycline therapy, 535
Paroxysmal nocturnal hemoglobinuria, use of clinical dextran in, 946
Pasturella tularensis; effect of Duolite treatment on growth promoting properties of blood and plasma, 633
Pathogenic staphylococci, potentially, tellurite as indicator, 120
Pathways, glucose metabolism and, 286
Penicillin, and cortisone, effects, on experimental staphylococcal infection in mice, 199
effects, on experimental infection produced by penicillin-resistant staphylococci, 165
Periodic acid–Schiff method for protein-bound carbohydrates in paper electrophoresis, elimination of background staining, 158
pH stat for control of pH in bacterial cultures, 639
Phage typing of staphylococci, techniques and interpretation, 650
Phenylalanine in blood, determination, by enzymatic spectrophotometric method, 491
Pheochromocytoma, diagnosis, by bioassay for urinary catechol amines, 748
Phosphatase, leukocyte alkaline: role of zinc and magnesium, 303
Phosphorus, inorganic, glucose, and potassium, splanchnic uptake, after intravenous glucose load in patients with cirrhosis and in subjects without liver disease, 829

Pipetting tritium oxide, hazard, 164
Plasma, blood and, effect of Duolite treatment on growth promoting properties of, 633
electrolyte composition in dogs breathing high CO_2 mixtures: source of bicarbonate deficit in severe respiratory acidosis, 767
and erythrocytes, glycolytic, citric acid cycle, and hexosemonophosphate shunt enzymes in megaloblastic anemia, 425
human, comparison of methods of bioassay of erythropoietin in, 67
thromboplastin component deficiency, study of carrier state for, new assay, 936
volume, extracellular fluid volume, and red blood cell mass in man, simultaneous measurement, utilizing I^{131}, $S^{35}O_4$, and Cr^{51}, 776
Plastic, autoclavable, use of, for do-it-yourself solution to laboratory problems of safety, 319
Population studies, for urinary tract infection, clean-voided urine culture in, 557
Potassium content, changes, in erythrocytes in diabetic acidosis and during recovery, 449
gluconate, isolation of blood glucose as, 959
splanchnic uptake of glucose, inorganic phosphorus and, after intravenous glucose load in patients with cirrhosis and in subjects without liver disease, 829
Precipitin test, micro agar diffusion, modifications, 593
Pressures, normal pulmonary arterial, ventricular septal defects and, effect of exercise on pulmonary blood flow and left-to-right shunt in patients with, 689
Proaccelerin-accelerin (*See* Factor V)
Procaine amide in heart, negative chronotropism and inotropism of, 129
Protein-bound carbohydrates in paper electrophoresis, elimination of background staining in periodic acid-Schiff method, 158
Proteins, total serum, estimation by refractometer, 803
Proteinuria in experimental nephrosis, invalidation of hypothesis of dysproteinemia as cause, 510
Pseudomonas aeruginosa in clinical practice, evaluation of media for early detection, 139
Pulmonary arterial pressures, normal, ventricular septal defects and, effect of exercise on pulmonary blood flow and left-to-right shunt in patients with, 689
Pyelonephritis, experimental, susceptibility of rats with DCA hypertension to, and aggravation of DCA hypertension by renal infection, 715
Pyrogens, bacterial, metabolic effects, on leukocytes, 584
Pyruvate and citrate, splanchnic and peripheral metabolism, effect of intravenous glucose on, in patients with cirrhosis and subjects without liver disease, 841

R

Rabies, fatal human case, following bite of rabid bat (Lasionycteris noctavagans), 89
Radioactive diisopropylfluorophosphate (DFP^{32}), labeling of red blood cells: evidence for initial release of label, 416
Radioactivity, body, measurement, for studies of sodium metabolism, 476
total body, determination of iron absorption in rats by measurement, 929
Radiochromium, abbreviated method for blood volume measurement employing, 149
Radioiodine conversion ratio, modified resin method for determination, 132
Red blood cells (*See* Erythrocytes)
Refractometer, practical temperature-compensated hand (TS meter): estimation of total serum proteins by, 803
Renal concentrating ability in children with sickle cell anemia and in normal children, comparative study, 400
diseases, cardiac and, action of chlorothiazide in; acute effects on renal and systemic hemodynamics and metabolism, 182
excretion of sodium and water, effects of molar sodium lactate and equimolar sodium chloride, 897
failure, acute, removal of uric acid by artificial kidney in patients with, 268
infection, aggravation of DCA hypertension by, susceptibility of rats with DCA hypertension to experimental pyelonephritis and, 715
lesions produced by bovine gamma globulin potentiating effect of prior sensitization on, in hypersensitive rabbit, 439
Research funds, "socialization" of, 3
Respiration, glycolysis, and nucleic acid synthesis, leukocyte, 584
Respiratory acidosis, severe, source of bicarbonate deficit in: plasma electrolyte composition in dogs breathing high CO_2 mixtures, 767
gases, clinical application of gas chromatography to analysis of, 144
illnesses due to Asian strain influenza, adenovirus, and unknown cause, comparison of clinical manifestations, 497
Reticulocyte, immature, agglutination and sequestration, 663

Rheoplethysmographic studies of digital venous tone and venous activity, 342
Rheumatoid arthritis, reactions in latex-fixation test for, with serum of syphilitic individuals, 73
RNA, human leukemic, carried in tissue culture, leukemia and neoplasms induced in mice with, 706
and tumoral, biologic properties: effect of different media on cytopathogenicity in tissue culture, 694
Romanowsky stains for estimating hemoglobin content of red cells, 486
Russell's viper venom, new assay for factor V using, 625

S

$S^{35}O_4$, I^{131}, and Cr^{51}, use in simultaneous measurement of plasma volume, extracellular fluid volume, and red blood cell mass, 776
Safety, laboratory problems of, use of autoclavable plastic for do-it-yourself solutions, 319
Saliva, estimation of fucose in, 381
fucose and agglutinogen contents, in subjects with duodenal ulcers, 386
Salmonella pullorum agglutinins, diphtheria antitoxin and, in bovine milk and blood after immunization by udder infusion, 229
Schiff, periodic acid, method for protein-bound carbohydrates in paper electrophoresis, elimination of background staining, 158
Septal defects, ventricular, and normal pulmonary arterial pressures, effect of exercise on pulmonary blood flow and left-to-right shunt in patients with, 689
Sequestration, agglutination and, of immature red cells, 663
Sera, arginin ester hydrolysis by, colorimetric determination, 616
Seromucoid, serum, and acid mucopolysaccharide in Marfan syndrome, 221
Serum arginase activity in hepatocellular damage, 522
benzidine oxidase, 260
blood, azure A level in determination of gastric acidity by tubeless gastric analysis, 815
cholesterol and valvular sudanophilia, effect of neomycin alteration of rat intestinal flora on, 55
copper, spectrophotometric determination, with oxalyldihydrazide, 325
electrophoretic patterns, in thyroiditis, 733
and erythrocytes, equilibration of glucose-C^{14} between, 281
lipoproteins in man, paper electrophoresis in evaluating effect of long-term estrogen therapy on, 682
protein-bound iodine measurement, reliability of alkaline-incinerator method, 643
Serum—Cont'd
proteins, total estimation, by refractometer, 803
quantitation of gamma globulins in, by immunoprecipitation, 605
seromucoid and acid mucopolysaccharide in Marfan syndrome, 221
of syphilitic individuals, reactions in latex-fixation test for rheumatoid arthritis with, 73
Shunt, left-to-right, estimation, from arterial dilution curves, 77
pulmonary blood flow and, effect of exercise on, in patients with ventricular septal defects and normal pulmonary arterial pressures, 689
Sickle cell anemia, renal concentrating ability in children with, compared to normal children, 400
trait, influence of storage on erythrocyte survival in blood plasma from donors with, 94
"Socialization" of research funds, 3
Sodium chloride challenge, chronic, in man, 362
excretion defect in hepatic cirrhosis, use of steroidal lactone, 872
lactate, molar, and equimolar sodium chloride, effects on renal excretion of sodium and water, 897
metabolism, measurement of body radioactivity for studies, 476
Spectrophotometric determination of blood oxygen content, 784
of serum copper with oxalyldihydrazide, 325
method, enzymatic, for determination of phenylalanine in blood, 491
Splanchnic and peripheral metabolism of endogenous pyruvate and citrate in patients with cirrhosis and in subjects without liver disease, effect of intravenous glucose on, 841
uptake of glucose, inorganic phosphorus and potassium after an intravenous glucose load in patients with cirrhosis and in subjects without liver disease, 829
Staining, background, elimination, in periodic acid–Schiff method for protein-bound carbohydrates in paper electrophoresis, 158
Stains, Romanowsky, for estimating hemoglobin content of red cells, 486
Staphylococcal infection in mice, experimental: effects of inoculum size, strain variation, penicillin, and cortisone, 199
typing, rapid method for preparation of bacteriophage suspensions for, 809
Staphylococci, penicillin-resistant, effects of penicillin on experimental infection produced by, 165
potentially pathogenic, tellurite as indicator, 120
techniques and interpretation of phage typing, 650

Steroidal conjugates, pure, hydrolysis, in aqueous solution, 812
lactone, in study of sodium excretion defect in hepatic cirrhosis, 872
Steroids, adrenal cortical α-ketolic, determination, by quantitative paper chromatography, 796
Sudanophilia, valvular, effect of neomycin alteration of rat intestinal flora on serum cholesterol and, 55
Surgical procedures, oral, bacterial invasion of blood after, 376
Syndrome, Hurler's, paper spot test useful in study of, 136
Marfan, serum seromucoid and acid mucopolysaccharide in, 221
Syphilitic individuals, reactions in latex-fixation test for rheumatoid arthritis with serum of, 73

T

Taschdjian's medium in diagnosis of vulvovaginal candidiasis, 820
Tellurite reduction as indicator of potentially pathogenic staphylococci, 120
Temperature-compensated hand refractometer (TS meter), practical: use in estimation of total serum proteins, 803
Test, antiglobulin consumption, and autoantibody eluates in immunohematology, 9
hemagglutination, for viral hepatitis; nonspecific reactions, 519
latex-fixation, for rheumatoid arthritis with serum of syphilitic individuals, reaction, 73
micro agar diffusion precipitin, modifications, 593
paper spot, useful in study of Hurler's syndrome, 136
Tetracyline therapy, long-term, and persistent parasitism in brucellosis, 535
Thyroiditis, chronic nonspecific, antibody molecule in: electrophoretic patterns of serum, 733
Tissue culture, cytopathogenicity in, effect of different media: biologic properties of human leukemic and tumoral RNA, 694
human leukemic RNA carried in, leukemia and neoplasms induced in mice with, 706
Tool, diagnostic, hemagglutination reaction as, in infectious hepatitis, 726
Tritium (H^3), labeling of antibody against Ehrlich mouse ascites carcinoma with, 46
oxide, hazard of orally pipetting, 164
TS meter, practical temperature-compensated hand refractometer: estimation of total serum proteins by, 803
Tumor, labeling antibody against, with tritium (H^3), 46
Tumoral RNA, human leukemic and, biologic properties: effect of different media on cytopathogenicity in tissue culture, 694
leukemia and neoplasms induced in mice with human leukemic RNA carried in tissue culture, 706

U

Ulcers, duodenal, fucose and agglutinogen contents of saliva in subjects with, 386
Uric acid, removal of, by artificial kidney in patients with acute renal failure, 268
Urinary catechol amines, bioassay for, with strips of rabbit aorta, 748
tract infection, clean-voided urine culture in surveying populations for, 557
Urine, hydrolysis test for primitive white blood cell differentiation evaluation, 883

V

Valvular sudanophilia, effect of neomycin alteration of rat intestinal flora on serum cholesterol and, 55
Venom, Russell's viper, new assay for factor V using, 625
Venous tone and activity, digital, rheoplethysmographic studies of, 342
Ventricular septal defects and normal pulmonary arterial pressures, effect of exercise on pulmonary blood flow and left-to-right shunt in patients with, 689
Viruses, infectivity and interrelationships of 2060 and JH, in volunteers, 331
Vitamin B_{12}, Co^{58}-labeled, distribution in rat with fatty metamorphosis and cirrhosis of liver, 29
Vulvovaginal candidiasis, Taschdjian's medium in diagnosis, 820

W

Water, sodium and, renal excretion, effects of molar sodium lactate and equimolar sodium chloride, 897
White blood cells (*See* Leukocytes)

Y

Yeast phase of Blastomyces dermatitidis and other fungi, in vitro effects of antibiotics on, 116

Z

Zinc and magnesium, role in leukocyte alkaline phosphatase, 303
